

RecoMart Model Performance & Evaluation Report

Machine Learning Performance Metrics

1. Executive Summary & Model Overview

The recommendation engine was trained on 2026-07-20 using SVD Matrix Factorization Collaborative Filtering coupled with Content-Based feature similarity.

2. Hyperparameters & Configuration

Parameter	Config Value
k_factors	10
top_k_evaluation	5
test_split_ratio	0.2

3. Benchmark Evaluation Results

Metric Name	Category	Score Value
Precision@K	Ranking Accuracy	0.0434
Recall@K	Coverage	0.117
NDCG@K	Ranking Decay	0.0792
RMSE	Rating Root Mean Squared Error	2.8064
MAE	Mean Absolute Error	2.5917
